WIDE®

EZ RING

Eco-friendly

- Less nickel and steel are used as the metal housing and boosters are replaced by non-toxic plastic; it is more environmental-friendly than conventional ring mechanisms.

More Durable

- Plastic housing and boosters have greater resistance against rust, scratches and dents. It can reduce the possibility of getting rust or oxidized by genuine leather for longer storage.

Cost Saving

- The price is more competitive and stable than the conventional ring mechanisms as less nickel plating and steel materials are required.

More Convenient

- Less weight than conventional ring mechanisms, it is more convenient and easier for users to carry.

Innovative Outlook

- Colorful plastic housing can brighten up your binders. You can choose various colors to match your binder theme and categorize documents.

Enhanced Safety

- It reduces the risk of nickel allergy because of less contact with nickel.
