

I-RING II

Save Our Earth. Save Your Cost.

Easy Assembling

- Being equipped with a tiny additional metal plate, it facilitates the easy and efficient assembly process especially in automatic production system. A mass of I-Ring II can be lifted and transported in one time by the magnetic lifter, saving the time and labour force in production.

Environmentally-friendly

- No nickel and steel is used, other than the tiny metal piece, for the whole mechanism; the metal housing, metal ring and blade are replaced by non-toxic plastic.
- It can be assembled in the binder either by standard rivets or plastic rivets.
- Metal and plastic can be disposed separately and easily for the purpose of recycling.

Cost Saving

- No nickel plating and steel design in I-Ring II enables its price to be more competitive and stable than the conventional ring mechanisms. You can also save the storage, handling and transportation cost through its light-weight design.

Trendy and Colorful Outlook

- Numerous colors of plastic ring mechanism can be matched with your binder theme and categorized documents systematically. Various colorful plastic rivets are also available for your preference.

one easy touch
one **WORLD**

WIDE®

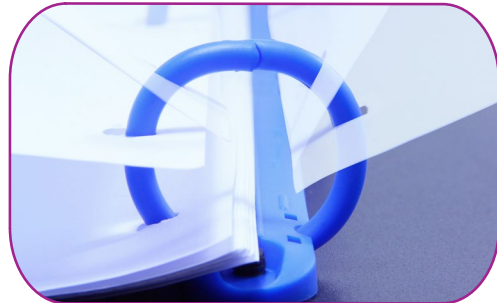

I-RING II

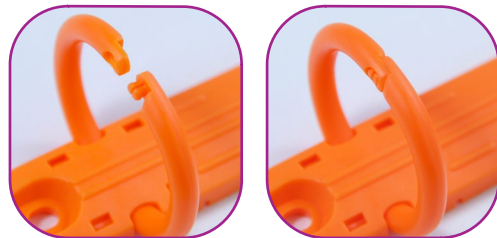

Large Opening

- As its flexible ring opening, bigger stacks of paper can be loaded and unloaded more easily in one go.

Gap Free

- It eliminates the problem of ring misalignment and your fingers will not get hurt anymore.
- You can also turn paper more smoothly and easily without any snag.

Secure

- The ring can be closed securely due to its well structure design, and it cannot be opened easily even falls from the height.

More Durable

- Its plastic body has greater resistance against rust, scratch, and dent for longer product life.

More Convenient

- With its light-weight body, it is more convenient and comfortable for you to carry.

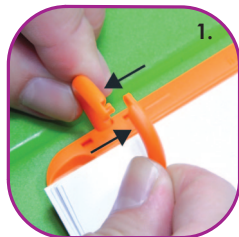

Soundless Operation

- No noise is produced while operating the ring mechanism. This enables you to enjoy a quiet environment for either working or studying.

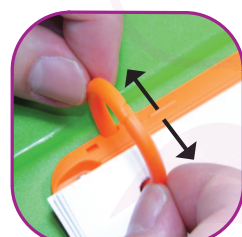

Enhanced Safety

- It is able to reduce the risk of nickel allergy because of no contact with the nickel plated parts.

Easy to operate
